

HOW TO EFFECTIVELY CLEAN UP A SPILL

Small details. Big difference.™

1 A spill has happened!

2 Display signs to inform customers a spill has occurred.

3 Have someone stand by to alert customers and block off the area entirely.

4 Brush or sweep up any broken glass.

5 Sweep or mop up the spill immediately.

6 Use a squeegee, wet/dry vacuum or clean, dry mop to remove any dampness from the floor. Keep wet floor signs up until the floor is completely dry; then remove them to the storage area.
